

DMS-Diemould would like to take this opportunity to thank all of our customers who came and visited us at PDM 2008.

Some of the many products that were on display, were our brand new range of Cumsa up and away mechanisms that were complimented with a 2 day visit by Ricardo Lopes from Cumsa. These items were very well received by all who took the opportunity to have a demonstration on how they function and the cost savings that could be made by their use.

We were also pleased to show our complete hot runner solutions package with samples from Heatlock, EMP and Heitec hot runner systems.

For more information on any DMS-Diemould products or to arrange a demonstration of these new and exciting components please call us on 01494 523811 or e-mail us at sales@dms-diemould.co.uk
